

# Science Workshop 2025

24 - 25 April 2025 at „Haus der Wissenschaft“ in Bremen

## Polarstern operations „Antarctica InSync“ and „Arctic Pulse“ 2027

*An initiative of:*

*National Committee SCAR/IASC*

*Alfred Wegener Institute, Helmholtz Centre for Polar and Marine Research  
DFG priority programme "Antarctic Research"*

The workshop will be a forum for sharing information and developing scientific ideas especially for the upcoming initiatives „Arctic Pulse“ and „Antarctica InSync“ between summer 2027 and spring 2029.

Contents: New insights into the current status of the AWI's Antarctic and Arctic research strategy with a focus on the international science missions “Antarctica Insync” and “Arctic-Pulse”. Antarctica InSync is a global effort to synchronize research across the Southern Ocean, connecting ice, ocean, climate, and life to protect this vital region. “Arctic-Pulse” is a Canadian-led international science initiative to better understand Arctic change by coordinating science across different land, marine and air-based platforms. Although this year's workshop will focus on the major campaigns mentioned above, with the plan for POLARSTERN to receive another class in 2027, there will also be a look ahead to the period 2029-2030.

### **Organizing committee:**
